Administrative Verification Report

Case T11 · two independent warnings · generated from the checker output

Input file	T11_two_independent_defects.pdf	**Pages**	38
Input SHA-256	4ea8731fab3b45c9836d94a67d08664b6916544d57fb39ff8bdd73a84a9126cc	**Checker**	0.1.0
Reference inputs	Synthetic expected inventory + version register	**OCR / AI**	Not used

Warnings for human verification

ID	Document / location	Discrepancy and supporting evidence	Suggested human action / uncertainty
W01	**Not applicable — bundle-level page label** PDF page 12	**BUNDLE PAGINATION MISMATCH** Printed BUNDLE_PAGE is 13; PDF physical position is 12.	Check continuous page numbering and its starting point. **Confidence:** High that the printed label and PDF physical position disagree; does not establish which numbering convention is required.
W02	**DOC-03** No physical page; expected item DOC-03	**MISSING EXPECTED DOCUMENT** Document is listed in the supplied expected inventory but no page carries this document identifier.	Check the source file set and confirm whether the expected document belongs in this bundle. **Confidence:** Medium-high for absence of this identifier from the supplied text layer; depends on inventory correctness and readable identifiers.

Scope and limitations

This report reflects only text markers and reference data supplied with a fictional 40–60 page test bundle. The checker did not use OCR or AI and did not inspect semantic content, legal relevance, authenticity, admissibility or court-specific requirements. A warning is a prompt to compare the source material, not a legal conclusion. No real case or person is represented.

Administrative verification only. This report does not establish legal completeness, procedural compliance or filing readiness. Final review remains the responsibility of the qualified legal professional.
